Volume 131 June 1983

CONTENTS

The spreading of a liquid on a rough solid surface. R. G. Cox *page* 1

An update on non-stationary oblique shock-wave reflections: actual isopycnics and numerical experiments. R. L. Deschambault and I. I. Glass 27

On weak reflection of water waves. Philip L.-F. Liu and Ting-Kuei Tsay 59

A closed-loop gravity-driven water channel for density-stratified shear flows. D. C. Stillinger, M. J. Head, K. N. Helland and C. W. Van Atta 73

Experiments on the transition of homogeneous turbulence to internal waves in a stratified fluid. D. C. Stillinger, K. N. Helland and C. W. Van Atta 91

On the structure of turbulent flow over a progressive water wave: theory and experiment in a transformed wave-following coordinate system. Part 2. Chin-Tsau HSU and En Yun Hsu 123

Diffusion in a dilute polydisperse system of interacting spheres. G. K. Batchelor 155

Flow development in the vicinity of the sharp trailing edge on bodies impulsively set into motion. Part 2. James C. Williams and Keith Stewartson 177

On inertial flow over topography. Part 1. Semigeostrophic adjustment to an obstacle. L. J. Pratt 195

Interacting-flow theory and trailing-edge separation – no stall. F. T. Smith 219

The fluid dynamics of an attic space. Dimos Poulikakos and Adrian Bejan 251

A liquid compound jet. C. H. Hertz and B. Hermanrud 271

Viscosity renormalization based on direct-interaction closure. George F. Carnevale and Jorgen S. Frederiksen 289

The calculation of separation bubbles in interactive turbulent boundary layers. Tuncer Cebeci and Suzanne M. Schimke 305

The structure of a separating turbulent boundary layer. Part 5. Frequency effects on periodic unsteady free-stream flows. Roger L. Simpson and B. G. Shivaprasad 319

The fluid mechanics of flame tips. J. Buckmaster and A. B. Crowley 341

Experiments on the turbulence statistics and the structure of a reciprocating oscillatory flow. Mikio Hino, M. Kashiwayanagi, A. Nakayama and T. Hara 363

The hybrid model and its application for studying free expansion. G. J. Pert 401

The propagation of a voidage disturbance in a uniformly fluidized bed. D. J. NEEDHAM and J. H. MERKIN 427

The onset of cellular convection in a shallow two-dimensional container of fluid heated non-uniformly from below. I. C. WALTON 455

REVIEW
Turbulence Models and Their Application in Hydraulics, by W. Rodi 471

CORRIGENDUM 471
